

Grow with MEF Pre-doctoral research scholarships

This year, we will consider again superb candidates with a record of outstanding analytical skills to be part of our Grow with MEF program (GwMEF). GwMEF fellows are granted a 80% reduction in the tuition fee, and are also entitled to one of our TAsip/RAsip with monthly stipend of 800 euros for the entire academic year.

MEF applicants will be considered for the GwMEF scholarship only if they meet ALL the following criteria:

- Hold a BA in Engineering, Mathematics or Physics with GPA over 8.5/10 (or equivalent), or a BA in Economics, Finance or Business with GPA over 8.5/10 (or equivalent). In the latter case, candidates will be considered only if they took undergraduate courses on Calculus, Algebra, Statistics, and Econometrics, and got a high grade (above 85%) in most of these courses, or, alternatively, if they are above the 85 percentile in the quantitative part of the GRE.
- Provide two outstanding letters of recommendations, preferably signed by professors of one of the relevant areas above (mathematics, economics, physics or statistics).

- Proof of completion of (at least) three-year undergraduate studies conducted entirely in English, including all teaching, assessments and examinations. Alternatively, the candidate must have a C1 Advanced (Cambridge) or above 104 points in the TOEFL exam (or equivalent).
- Provide a strong motivating letter on the intrinsic and extrinsic motivations of the candidate (a) to study the MEF at UNAV and (b) to become a GwMEF fellow.

The Board of Management will consider all the MEF applicants that satisfy all the criteria above as GwMEF potential candidates, and will grant a maximum of 5 scholarships per academic year. The decisions of the Board of Management on the allocation of the GwMEF among applications that satisfy all the criteria above are irrevocable.

Dates: The GwMEF fellows will be decided among all MEF applications in two waves: (a) January 2023 (early-bird); (b) Late Spring 2023.
